

You have a wide range of options both within and after completing a vocational programme, and you are entitled to study towards higher education admission either alongside or within the programme. Vocational programmes lead to work straight after completion.

Further study

Vocational educator

Network security

Bachelor of Engineering in mechanical engineering

Bachelor of Engineering in electronics

Computer and system science

Power engineer - renewable energy

Civil engineer - Energy systems

COLLEGE/UNIVERSITY

Examples of educational programmes

Electrical power engineer

Qualified railway engineer

Automation engineer

Hydraulic system engineer

IT infrastructure specialist

Aviation engineer

Broadband project planner

Heating, power and operation technician

VOCATIONAL COLLEGES

Examples of educational programmes

# Electricity and energy programme

## ELECTRICAL ENGINEERING

Examples of jobs

Industrial electrician

Railway electrician  
Electricity and signalling

Security and alarm  
technician

Telecommunications technician

Lift system installer

Installation electrician

Distribution electrician

Electronics repairer

## ENERGY ENGINEERING

Examples of jobs

Operation and maintenance  
Power and heating technology

Heating system installer

Robotics technician

Certified  
energy technician

Water and environmental  
engineering

Operation and maintenance  
Water and environmental  
engineering

## COMPUTER AND COMMUNICATION ENGINEERING

Examples of jobs

IT technician

Computer technician

Technology salesperson

Electronic production  
technician

Home service technician

Network technician

## AUTOMATION

Examples of jobs

Automation operator  
in industry

Automation operator  
in real estate

Automation operator  
in processes

Mechatronics engineer

Operation and control engineer

Self  
employment

CEO

Salesperson

Supervisor
